

19. The method of claim 12, wherein depositing the filter comprises:  
transferring the filter from a supplier to an assembler in a tray;  
removing the filter from the tray; and  
placing the filter into the aperture of the enclosed system.
20. The method of claim 19, wherein depositing the filter further comprises:  
mounting a seal layer to the outer surface of the tray and a portion of the  
filter, wherein the seal layer includes a liner and a seal; and  
fastening the liner to the tray with a fastener to prevent the seal from  
adhering to the tray when the filter is removed from the tray.
21. The method of claim 20, wherein mounting the liner further comprises  
providing a slit in the liner to ease detachment of the liner from the seal and the  
filter.
22. An enclosure system for a mechanical device comprising:  
an enclosure having an outer surface and an inner surface;  
an aperture extending between the outer surface and the inner surface of  
the enclosure, wherein the aperture has a larger cross-section  
adjacent the outer surface than adjacent the inner surface; and  
mounting means for mounting a filter within the aperture.
